Starr Constructions is luxury home building company with over 40 years of experience. ComputerWerx has been looking after our IT since 2013. They have given us the peace of mind we need to be able to focus on our business.

May it be Servers or terminal issue ComputerWerx is there to fix it immediately. Their knowledge about the systems and software that we use is unparalleled. Besides the knowledge and experience, their cost-effective approach to IT infrastructure and implementation is what sets them apart from other IT companies that we have used in the past.

We find them extremely honest, reliable, trustworthy and efficient; and would highly recommend their services to others.

If you need more information or have any queries, feel free to contact the undersigned.

Regards,

Nino Sanzari - Director
